
WHO TO SEE...

Our reception team

Our receptionists are the people you will see or speak to first when contacting the practice. They can help you with a number of queries, including;

- Booking or cancelling appointments
- Requesting repeat medications
- Requesting repeat sick notes
- Relaying test results
- Updating your contact details
- Registering you if you are a new patient
- Signing you up for our text messaging and online services

Please note that our reception team are not clinically trained, and so are not able to give medical advice or interpret test results.

WHO TO SEE...

An introduction to our team

WHO TO SEE...

This leaflet is designed to give you an introduction to our practice team, when they usually work and what they can see people for.

Our GPs can help for any general medical query, but some of them also specialise or have an interest in particular fields of medicine. There are also some things—such as child immunisations—which only our Practice Nurses can do.

WHO TO SEE...

Lisa Brew

Role

Nurse Practitioner

Usual days

Tuesday

See Lisa for...

Advanced Nurse Practitioners can provide treatment and advice for many problems for which you may have seen a GP for in the past. They can assess and examine you, make a diagnosis and provide advice and treatment including a prescription if required. They can make referrals to hospital doctors or other healthcare professionals and admit patients to hospital if required.
